---

**Access roads and vehicle parking:** We require safe parking in the area or in its close proximity for 1x van and 1x personal car. In case of overnight stay, guarded parking is necessary. In order to unload the equipment, it is necessary to ensure that the vehicle can be parked as close as possible to the stage so that it can be prepared for production in time.

**Preparation of instruments and equipment:** To prepare our equipment, we need a covered and dry area with sufficient lighting at night and secured against the entry of unauthorized persons. The organizer will provide at least 2 qualified stagehands at unloading and loading of our equipment. Stagehands will be available when the band arrives for unloading and after the performance for loading. During all this time stagehands remain sober.

**Dressing room:** Please provide a separate, lighted, lockable dressing room with basic equipment included (table, 8 chairs, 230V socket, mirror). Toilets for band&crew must be near the changing room.

**Catering:** Please prepare catering for the band and crew (8 people).

- 10 pcs (0.5l PET bottle with mineral water) + 1x 6pack non-alcoholic beer (unflavored)
- 10x chilled beer 0,5l + 1x 0,7l quality white wine
- 2x Coca-Cola (Kofola) 2l + 1x juice (orange or apple)
- fresh fruits (grapes, apples, banana) + chocolate bars : Sneeker or Milky Way
- 8x hot meal preferred!!! Alternative in the form of cold buffet (ham, salami, bread, vegetables...) is acceptable.

**Stage:** The stage must be solid, non-conductive, level and clean with minimum dimensions of 8x6m and in the case of an outdoor event it must be covered and protected from sides. We require a riser for a drummer with dimensions 3x2x0.2 – 0.4m and possibility to hang a backdrop with dimensions of 8 x 6m (6x5m).

**Stage lighting:** The stage lighting must be done with at least basic lights (par, wash, spot, led...). The lighting must be operated by an authorised and responsible person.

**Soundcheck:** The band reserves the right to perform a soundcheck. This is done on the prepared and empty Stage. The time of the soundcheck will be discussed in advance with the band representative.

**PA system and stage monitors:** We require professional equipment of established brands that is able to achieve adequate performance across the entire sound spectrum. Please remove stage monitors from the stage before our load-in!!! All information regarding sound and stage requirements to be found in our stage plan.

**Place for merchandise booth:** We require a suitable place for the EUFORY merchandise booth. Booth must be equipped with table, suitable lighting and 230V power supply.

**Accommodation:** We require accommodation of the usual type for an overnight stay for 8 people. Make sure there are enough fully equipped beds! Accommodation is not mandatory at every event and depends on travel distance. Please discuss with the band manager!!!

**Thank you**
